DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11 June 2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-12, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Reilly et al (US 5,779,675).

Reilly teaches a syringe adaptor comprising a rear mounting member (132) and a front mounting member (133). The front member includes capture members (114) which engage the syringe at (120) and terminates in a distal ledge (142). The rear member includes tabs (132) or threads/annular ridges. The rear member will connect to the syringe with movement in any of a rotational, axial, or vertical direction depending on the position of the injector housing. See Figures 10 and 11.

Response to Arguments

4. Applicant's arguments with respect to claims 1-12, 14 and 15 have been considered but are moot in view of the new ground(s) of rejection.
